

Med-Surg RN

The Registered Nurse, as a professional practitioner employed by Midwest Nursing & Vascular services, assumes responsibility and accountability for the application of the nursing process and the delivery of patient care. The nurse demonstrates ability to make clinical judgments in an effective and efficient manner with supervision. The nurse demonstrates critical thinking and performance ability in the coordination of patient care. Consistently performs according to nursing standards and is accountable in managing patient care and assisting others in the management of patient care. The nurse always demonstrates exceptional communication skills in a friendly and courteous manner.

Key Duties and Responsibilities:

- Utilizes the nursing process to assess, plan, implement and evaluate patient care.
- Assess signs and symptoms indicating physiologic and psychosocial changes in the patient's condition.
- Collects, analyzes, and interprets data and information from health care members and documents actual and/or potential nursing diagnoses.
- Documents the patient's plan of care using identified nursing diagnoses, expected patient outcomes, and selected nursing interventions.
- Performs interventions according to identified priorities, plan of care, and the hospital policies and patient care outcome standard.
- Revises the plan of care according to evaluation, changes in medical plan of care, and effective/ineffective nursing interventions.
- Uses clinical judgment in evaluation activities to meet patient care needs of an assigned unit/floor including establishing priorities.

Minimum Requirements:

- Current Registered Nurse License for the State.
- Proof current MMR & Varicella Titers, TB, and FLU immunizations
- Two years professional nursing experience in required area.
- Current BLS, ACLS.
- Approved Professional Background screening.
- Negative 10-Panel Drug Screen
